

EPSOM SALTS

(Magnesium Sulphate)

Corrects magnesium deficiencies in all soils and crops

Total Magnesium Oxide (MgO) 16.0% Active Ingredient: 9.5% Magnesium (Mg)

RECOMMENDED USES

Epsom salts encourage strong leaf growth, as well as producing luxuriant foliage on leafy shrubs and flowering plants. They help provide a rapid and long-lasting source of magnesium for plants during the growing season and are ideal for counteracting leaf yellowing caused by magnesium deficiency and also improve magnesium levels in the soil.

Epsom salts can be used with vegetables such as tomatoes, lettuce, broccoli, cauliflower, cabbage and other brassicas, and can also be used on leafy shrubs, flowering plants and fruit trees.

FEEDING RECOMMENDATIONS

Improving soil: 17 grams per square metres (½ ounce per square yard)
For best results, the granules should be worked into the soil. During dry weather, water in after application.

Correcting magnesium deficiencies: 70 grams per 9 litres (2½ ounces per gallon).

APPLY

Apply throughout the growing season from March to the end of September every 4 to 6 weeks.

CAUTION

- ◆ Do not over apply. Increasing the dosage may result in damage to your plants.
- ◆ Store in a dry, frost-free place away from children, pets and foodstuff.
- ◆ Wash hands and exposed skin after use.
- ◆ Wear gloves when handling.
- ◆ Do not spray in sunny conditions.
