

LAWN SAND AND MOSSKILLER

A granular formulation containing 14.1% w/w iron sulphate heptahydrate (equivalent to 7.7% w/w iron sulphate anhydrous), for the control of moss on lawns.

3 kg treats 37.5 m²; 20 kg treats 250 m²

When to Use

[Lawn Sand and Mosskiller](#) can be used when moss is actively growing. Do not apply during drought or freezing conditions. To avoid drift of granules or dust on to plants, patios or ponds, do not apply in windy weather.

Apply only to established turf. Grass should not be cut 3 days before treatment and not cut again until at least 4 days after treatment.

How to Use

Application by Hand

Mark out areas to be treated. Wearing gloves, sprinkle evenly at 80 grams per square metre over the marked area.

Application by Spreader

Mark out areas to be treated. Apply evenly at 80 grams per square metre over the marked area with a suitably calibrated granular applicator.

Further Information

The moss will blacken as it dies. Any discolouration of the turf is temporary.

Avoid walking on treated areas until it has rained or product has been watered in. If spilt on paving, concrete, etc., brush off immediately to avoid discolouration. If no rain falls within 48 hours of treatment, irrigate treated area.

Dead moss can be removed by raking or scarify 7–14 days after treatment. Re-treatment may be necessary for heavy moss infestation, or if moss returns. Do not apply more than 2 times in any one season. Allow 40 days between applications.

Moss Control Techniques

The key to reducing moss is to have an effective all-year round management strategy incorporating the use of [Lawn Sand and Mosskiller](#).

The following non-chemical techniques can be used to help reduce moss:

- Ensure the turf is healthy, weed, disease and pest free. This can be helped by fertilization and regular maintenance.
- Soil aerating of the lawn to help to encourage the free passage of water and

nutrients through the soil.

- ❑ Raking/scarifying to remove dead mosses and removal of fallen leaf debris to prevent the build-up of fibrous material which encourages weed and moss growth.

Following this guidance and using [Lawn Sand and Mosskiller](#) will successfully reduce mosses in lawns.

Safety Instructions

Protection during/in use

WASH HANDS AND EXPOSED SKIN AFTER USE.

If swallowed, seek medical advice immediately and show this information leaflet.

Environmental protection

DO NOT CONTAMINATE WATER with the product or the bag.

Do not empty into drains.

Storage and disposal

Store in a cool, dry place.

KEEP IN ORIGINAL BAG, tightly closed, in a safe place.

KEEP PRODUCT AWAY FROM CHILDREN AND PETS.

[Lawn Sand and Mosskiller](#) contains 14.1% w/w iron sulphate heptahydrate

Warning

Causes serious eye irritation.

Wash hands thoroughly after handling.

Wear protective gloves/eye protection.

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

If eye irritation persists: Get medical advice/attention.

Take off contaminated clothing and wash before reuse.

Keep out of reach of children.

If medical advice is needed, have this information label at hand.

To avoid risk to human health and the environment, comply with the instructions for use.
