

MAXICROP NATURAL FERTILIZER

Approved for Organic Growing

5 – 2 – 5

Maxicrop Natural Fertilizer (MNF) is made from plant extracts and seaweed. No animal products are used. MNF stimulates beneficial soil microbes, which results in an improved root system to take up more soil nutrients and water. MNF also helps to keep leaves greener, with more chlorophyll, to improve the use of sunlight energy for carbohydrate production. Together with the balanced natural fertilizer from plant extracts, this results in better, healthier growth, with ALL types of crops and plants.

DIRECTIONS: SHAKE BOTTLE BEFORE USE

FOLIAR SPRAY: using a knapsack sprayer, mix 125 ml per 10 litres of water. Apply at 10 to 14 day intervals or as required.

SOIL DRENCH/FERTIGATION: mix 4-5 ml per litre of water. Apply to the root zone at 7–14 day intervals or as required. Can be applied more frequently at lower concentrations.

Once diluted, use within 3 days and flush fertigation lines after use.

Store out of direct sunlight above 0°C and below 30°C.

Wash hands after use.

Compound Fluid Fertilizer (w/w)

Total Nitrogen (N) 5%

Phosphorous Pentoxide (P₂O₅) 2% (P=0.8%)

Potassium Oxide (K₂O) 5% (K=4.2%)
