

POTATO FERTILIZER

ANALYSIS

NPK Fertilizer: 6 – 10 – 10

Total Nitrogen (N)	6.0%
Phosphorus Pentoxide (P_2O_5)	
soluble in neutral ammonium citrate and water	10.0% [4.4% Phosphorus (P)]
soluble in water	9.0% [4.0% Phosphorus (P)]
Potassium Oxide (K_2O)	10.0% [8.3% Potassium (K)]

INTRODUCTION

- Carefully balanced organic nutrients for better potato crops.
- Can be used for potatoes grown directly outdoors, grown in containers (either outdoors or under protection), or grown in the greenhouse.
- Promotes bumper potato harvest and is also recommended for other vegetable crops.
- Apply when planting: provides slow release of nutrients.

APPLICATION RATE

35 to 70 grams per square metre (1 to 2 ounces per square yard).

STORE IN COOL, DRY CONDITIONS

TO BE USED ONLY AS A FERTILIZER

KEEP AWAY FROM CHILDREN, PETS AND FOOD

WASH HANDS AFTER USE
